

HOW TO PLAY

INDIGO

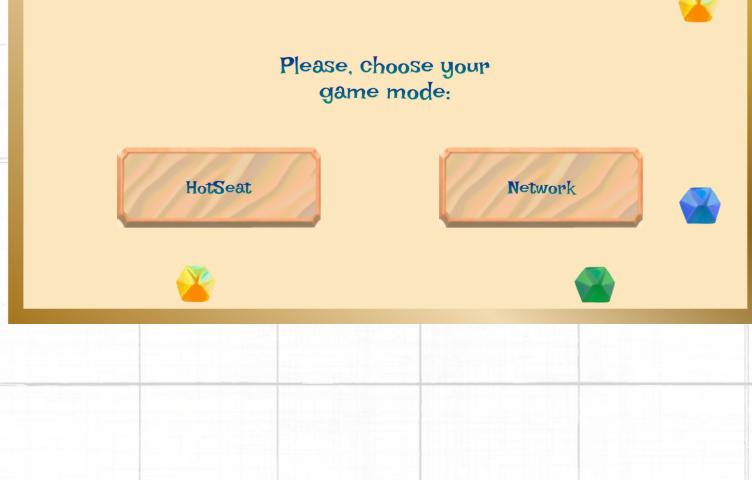

STARTING A NEW GAME

Starting your adventure is easy! Choose 'Start new game' to begin afresh or 'Continue game' to pick up where you left off. Indigo invites you to a world of strategic planning and colorful gems.

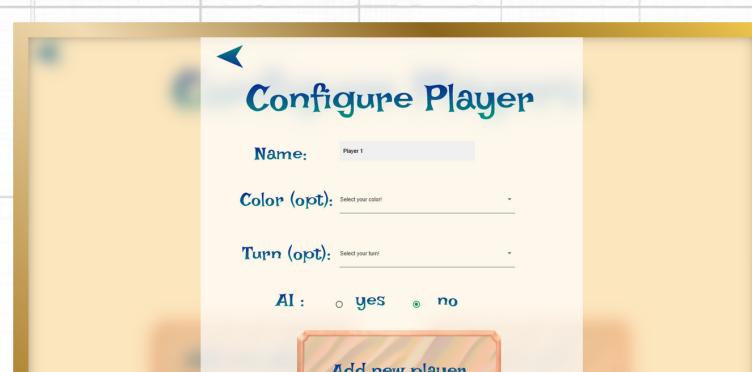

CHOOSING YOUR GAME MODE

Choose your game mode: 'HotSeat' for a shared device experience with friends nearby, or 'Network' to connect with players over the internet. Which will you choose?

ADDING A NEW PLAYER

Time to bring players into the HotSeat mode. Click 'Add new player' and customize each player with a name, optional favorite color and turn order. Decide if you want the AI to make your moves.

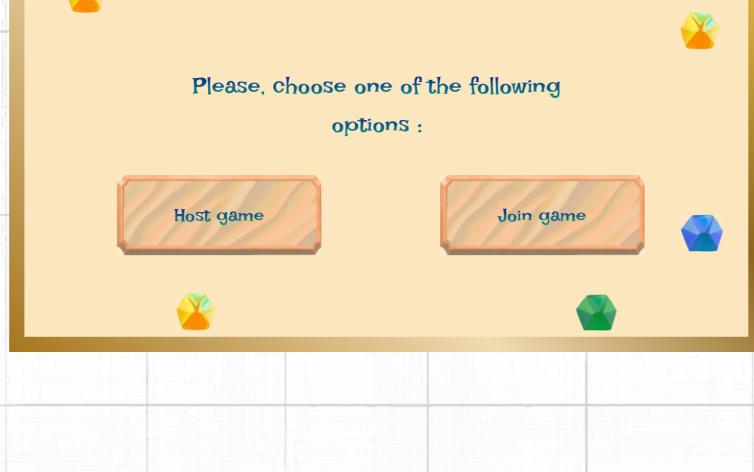

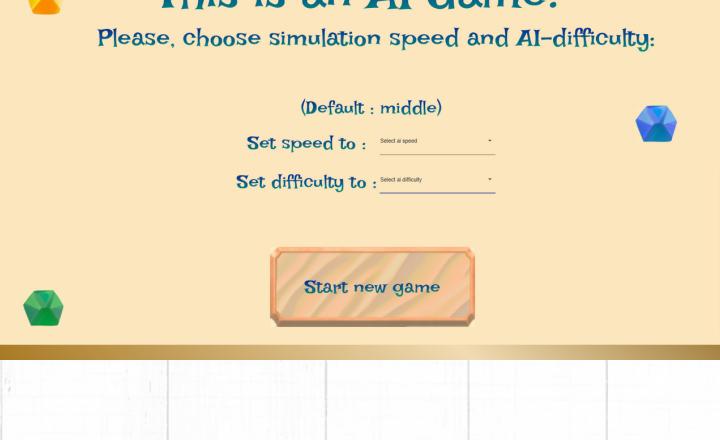

SELECTING GATES

For three players select your board layout: 'SharedGates' for collaborative exits or 'SeparatedGates' for a more competitive edge. Your choice affects your strategy!

CONFIGURING YOUR AI

If you chose to play as an AI, gear up for a mind-bending match in AI mode! Set the simulation speed to your liking and choose the AI difficulty. Press 'Start new game' to begin the gem quest!

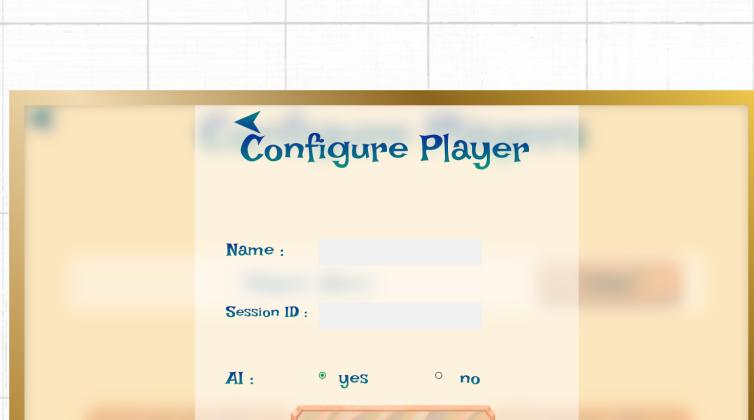

CHOOSING A NETWORK MODE

Dive into the competitive world of Indigo with Network Mode. Connect with friends or challenge opponents across the globe.

HOSTING A GAME

Hosting a game is simple. Enter your name, and if you like, provide a session ID for friends to join easily. Decide if you want AI players to join the fray!

JOINING A GAME

Ready to join the action? Enter your name and the session ID you've been given. Select if you want an AI to make your moves and then you're all set to join the game.

CONFIGURING PLAYERS

For game hosts : customize your game experience. Add new players, configure existing ones, or jump straight into the action with 'Start new game'. It's all about your preference!

PLAYING INDIGO

This is where the magic happens. Place tiles to create paths, guiding gems to your exits. Only in HotSeat mode: utilize 'Undo' and 'Redo' for adjustments, and 'Save' to secure your game progress.

- Your upcoming tile is located down your name, primed for play.
- Look for the blue hue around your tile—it's your turn to shine.
- Use ⚡ to rotate your tile. Perfect alignment? You're almost there!
- Click your chosen spot on the board to turn it red. Not quite right? Click around until you're set!
- Happy with your master plan? Hit the checkmark ✓ to lay down your path to victory!

Strategize to outmaneuver opponents. Remember: Sapphires are worth 3 points, Emeralds 2, and Ambers 1. The player with the most points when all gems are claimed wins!

ENDING GAME

As all gems are claimed, the game concludes. Celebrate your victory or reflect on your strategies. Ready for another round? Start a new game, restart game with the previous player configurations, or exit if you must say goodbye.

Thanks for playing Indigo—where every match is a new quest, and every path tile a step towards victory. Until next time, Keep those gems gleaming and your strategies sharp!
